

How to install OverDrive's app on a Nabi tablet

Enable "Mommy Mode" or "Daddy Mode" and download OverDrive for Android

1. Tap the Menu button then select Mommy Mode or Daddy Mode.

2. Enter your password. When you are done typing, hit the return key to hide the keyboard.

3. Tap Submit.

4. Follow the steps under Option 2 to install OverDrive from the Nabi's web browser (see reverse page).

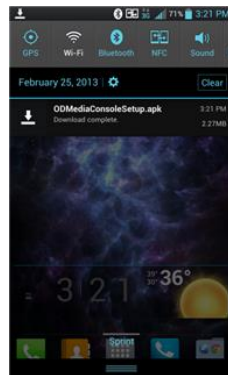

If you still have questions about this specific device, check out the Nabi support page:
<http://www.nabitablet.com/support/products>

Option 2: If you do not have access to Google Play Store, install OverDrive directly

If you have an Android device that did not come with access to Google Play Store, you can try installing the Amazon Appstore (<http://www.amazon.com/gp/mas/get/android>), or follow the instructions below to install OverDrive's app directly.

1. Go to app.overdrive.com and scroll to the bottom.
2. Select download for **Android OS 4.0 (or newer)** or **Android OS v2.2–3.2**, depending on your device. If you're unsure what version of Android your device is running, go to **Settings**, then **About [Device]** or **Info**.
3. Review the license agreement. Tap **I Agree** to download the installation file.

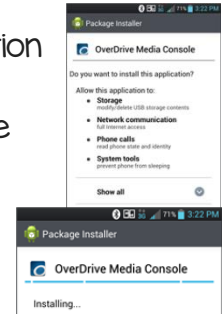

4. Pull down the notification bar. Tap the APK file once the download is complete.
5. If prompted, open the file with the "Package Installer."

6. If you get the "Install blocked" message, follow these instructions to allow installation from "Unknown Sources":
<http://help.overdrive.com/customer/portal/articles/1481562>. If you don't get this message, continue on.

7. Review the application permissions. Tap **Install** to start the installation.

The app installs.

8. Tap **Open** to launch OverDrive for Android, or tap **Done** to close the installer.
